

## Call for papers

MCDM is inviting papers for Vol. 15 (2020).

Guest editors: Prof. Tamal Datta Chaudhury, Prof. Somdeb Lahiri.

We invite original research papers on topics related to the methodology of Multiple Criteria Decision Making (MCDM) and its theoretical foundations. Multi-agent decision making/aiding (MADM/MADA) problems are also welcome, especially problems in social choice theory, where criteria are represented by the preferences of an individual. We also welcome research on choices with state-dependent preferences under risk and uncertainty, as well as real-world applications, case studies and software applications that support MCDM, MADM and MADA problems.

The deadline for vol. 15 (2020) is December 30, 2020.

Detailed requirements can be found on the WWW page: <http://mcdm.ue.katowice.pl/>

Submission of vol. 15 is free of charge.

**Multiple Criteria Decision Making (MCDM)**
